

Help Create a Sustainable Future!

Visit one of the Riverside-Corona Resource Conservation District's (RCRCD) two free educational sites for:

- tours and field trips
- workshops about native plants, waterwise yards, tree care, urban agriculture
- training, including California Naturalist, Project Learning Tree, and Citizen Science.

A demonstration garden of sustainable practices for native habitats, urban areas, and agriculture with plant lists and learning activities.

4500 Glenwood Dr. • Riverside, CA 92501

(951) 277-0219 scic@rcrcd.org

Pick up educational materials and find local resource management information online at <https://www.rcrcd.org/documents-publications>

RCRCD hosts outposts for the Santa Ana Watershed Community Science Network at both locations. 

Riverside-Corona Resource Conservation District

RCRCD is a local government agency that helps conserve the natural resources (soil, water, plants, and wildlife) of areas within western Riverside and San Bernardino Counties. RCRCD provides educational programs for the community, technical advice to land users, and conducts habitat conservation projects.
